

09 WILDLIFE JUDGING QUIZ

Activity I-B

For each question below, choose the most correct answer and circle the corresponding letter on your answer sheet provided.

21. What is the annual precipitation for the Eastern Deciduous region?
 - A. 5-10 inches
 - B. 10-20 inches
 - C. 20-40 inches
 - D. 35-70 inches

22. The climax vegetation for the Eastern Deciduous region is typically?
 - A. tall grasses such as bluestems, indiagrass, and switchgrass
 - B. mature deciduous forest
 - C. agricultural crops

23. Common native forbs in the Eastern Deciduous region include?
 - A. chickweed
 - B. ragweed
 - C. pokeweed
 - D. Both B and C
 - E. None of the above

24. Which of the following tree species are native to the Eastern Deciduous region?
 - A. shortleaf pine
 - B. mimosa
 - C. red maple
 - D. Douglas fir
 - E. Both A and C
 - F. Both B and D

25. What is the primary cause of shortleaf pine loss in this region?
 - A. fire suppression
 - B. grazing
 - C. disease
 - D. insects

26. What is the primary reason that large areas of forest have been cleared in this region?

- A. to create savannah
- B. for agriculture
- C. fire suppression
- D. road construction

27. Which of the following is not a food for the bobcat?

- A. buds
- B. mammals
- C. birds
- D. snakes

28. Which of the following is a food for the Northern Bobwhite?

- A. forbs
- B. carrion
- C. mammals
- D. eggs

29. Which of the following wildlife species do not consume grain?

- A. Northern bobwhite
- B. Wild turkey
- C. Wood duck
- D. Great-horned owl

30. Which of the following is not consumed by the Wild Turkey?

- A. buds
- B. leaves and twigs
- C. mammals
- D. seeds

31. Which of the following is a management practice that could improve habitat for the ruffed grouse?

- A. manipulation of succession
- B. pond construction
- C. plant food plots
- D. all of the above

| [09 WILDLIFE JUDGING QUIZ](#)

32. Which of the following is a management practice that could improve habitat for the wild turkey?

- A. establish grass and forbs
- B. retain snags
- C. ponds: deepen edges

33. Which of the following is a management practice that could improve habitat for black bear?

- A. nesting structures
- B. establish grasses and forbs
- C. timber management techniques

34. Which of the following is a management practice that could improve habitat for largemouth bass?

- A. pond construction
- B. pond: repair spillway
- C. timber management techniques
- D. all of the above
- E. Both A and B

35. Which of the following is a management practice that could improve habitat for the Mourning Dove?

- A. plant food plots
- B. plant trees
- C. ponds: deepen edges

36. Which of the following is a management practice that could improve habitat for the box turtle?

- A. tillage management
- B. manipulation of succession
- C. retain snags and down woody material

37. Which of the following is a management practice that would not improve habitat for the white-tailed deer?

- A. grain: leave unharvested
- B. manipulation of succession
- C. water level manipulation

| [09 WILDLIFE JUDGING QUIZ](#)

38. What represents primary habitat for the black bear?
- A. mature forests
 - B. native grasslands
 - C. agricultural fields
 - D. city parks
39. Which of the following management tools would be appropriate in dense forest to improve habitat for the Northern Bobwhite?
- A. prescribed fire
 - B. plant shrubs
 - C. timber management
 - D. both A. and C.
40. The Mourning Dove is found typically in open areas. Which of the following would be most detrimental for Mourning Doves?
- A. prescribed fire
 - B. water developments
 - C. planting large areas in trees
41. Which 2 stages of plant succession are preferred by the Brown Thrasher?
- A. 1 and 2
 - B. 2 and 3
 - C. 3 and 4
42. What is not ideal habitat for the Northern Bobwhite?
- A. savannah
 - B. native grass and forbs
 - C. large expanses of agriculture
43. Bobcat eat what?
- A. mammals
 - B. grass
 - C. leaves and twigs
 - D. buds
44. The Black bear is most correctly known as a?
- A. herbivore
 - B. omnivore
 - C. carnivore

45. What is the ideal ratio of habitat components for the eastern cottontail?
- A. all agriculture
 - B. 1/3 grassland, 1/3 cropland, 1/3 shrub
 - C. 2/3 cropland, 1/3 shrub
 - D. all grassland
46. Ovenbirds prefer what stage(s) of plant succession?
- A. 1
 - B. 2
 - C. 3
 - D. 6
 - E. all of the above
47. Which would be an appropriate management activity when deer are causing damage to agriculture crops?
- A. increase harvest
 - B. decrease harvest
 - C. construct ponds
 - D. all of the above
48. Northern bobwhite use which of the following types of cover?
- A. shrublands
 - B. grasslands
 - C. mature forest with no understory
 - D. both A and B
 - E. all of the above
49. Which of the following is true about the photograph below?
- A. it is largely agriculture
 - B. it has many shrubs
 - C. it is largely forest

| [09 WILDLIFE JUDGING QUIZ](#)

50. For which of the following species is the habitat in the photo the worst?

- A. white-tailed deer
- B. wild turkey
- C. Ovenbird
